DCRP/MP/19/09 - EREC P24 Issue 2
AC traction supplies to British Rail

This modification is progressing, engagement with National Rail is ongoing regarding the proposed amendments to EREC P29 which will be prepared to publish alongside EREC P24. Further updates will be provided.

DCRP/MP/20/04 - Data Exchange WG

The trial period is ongoing. Feedback received indicates that member companies are currently compiling information relating to all known connection points with IDNO networks.

Feedback is being collated for a further review of EREC G111 and the schedules planned for later in 2023. Updates will continue through this panel.

DCRP/MP/22/02 - Electricity System Restoration Standard (ESRS)

The second consultation on the proposed amendments has been released to coincide with the NGENO GC0156 Code Administrator Consultation. The DCode equivalent consultation will close 16th June 2023, after which all consultation responses received will be considered by the joint workgroup.

DCRP/MP/22/05 - Customer Islanding

Development of the legal text is progressing. The workgroup is currently focused on developing a range of diagrams to provide clarity, and considering the compliance requirements for devices which facilitate customer islanded premises.

DCRP/MP/23/01 - EREC P28 - Engineering Report (EREP)
Voltage fluctuations and the connection of disturbing equipment to transmission systems and distribution networks in the United Kingdom

The workgroup is discussing the need for a network study to provide clarity on the cause and effect of voltage fluctuations at the Point of Common Coupling with generation technology types. This will contribute to the development of an Engineering Report.

Stakeholder views on specific requirements of EREC P28 have been collated and the workgroup is currently developing a set of responses to be communicated with the relevant stakeholders.
