DCRP/MP/21/05 - Distribution Code compliance enforcement of Generators

This modification has now been approved by the authority (in mid-March), and was published as part of DCode version 49 on the 28th March 2022.

DCRP/MP/21/07 - EU Exit Modification

The public consultation for this modification closed in January, a final report to authority has been drafted and will be submitted to the authority with the approval of the panel before the next meeting.

DCRP/MP/21/08 - Fast Track
Replacement of the “Integrated Microgeneration and Storage” process

The members looking into this change have prepared a final report to authority addressing what is seen as the current size restrictions in an effort to ease the predicted increase in LCT connecting to the networks.

Any recommended changes to EREC G98 or G99 will be implemented as part of the next housekeeping mod and not a separate amendment change.

DCRP/MP/20/05 - EREC P18 Issue 2
Complexity of distribution circuits operated at or above 22kV

Engineering Recommendation P18 was approved under self-derogation at December’s DCRP panel meeting. The required changes to the DCode have been drafted into version 50 and intended for publishing alongside the EU Exit modification if approved (DCRP/MP/21/07).

DCRP/MP/19/09 - EREC P24 Issue 2
AC traction supplies to British rail

Any further development to P24 will be delayed to align with P29 expected publishing – P29 is currently undergoing review by members. P24 Issue 2 has seen majority of members of the group in agreement, with a further update being provided by the end of June.

DCRP/MP/20/04 - Data Exchange WG

Draft Copies of the guidance document have been circulated among DNO members for comment, these have been received and the Working group is currently reviewing before a final draft.

DCode

DCRP_22_02

Engagement with the INA has begun with the intention of holding a presentation on the work to provide visibility of the changes.

DCRP/MP/21/02 - EREC G100 Issue 2

Technical requirements for customers' export and import limitation schemes

The modification has reached final draft, a pros and a report paper has been submitted with this meetings document pack.

Discussion on the publication of EREC G100 will be held during the April meeting.

EREC Document Designations

Designation	Meaning
C	Cable
EB/TP	Electricity Board / Telecommunication Providers
G	Guidance
L	Lines (Overhead)
M	Maintenance
P	Planning
R	Reporting (NEDERS)
S	Switchgear
T	Telecommunication
