All

Below is my DAR from the Grid Code Review Panel meeting. This was a special meeting with the objective of deciding whether the GC0100-102 Workgroup work (relating to the RfG EU Network Code) could proceed to Code Administrators Consultation. This was agreed.

Other interesting snippets highlighted in yellow

Regards Alan

1 Welcomes		<ul style="list-style-type: none"> • Chrissie was unable to attend
2 Purpose of the meeting		<ul style="list-style-type: none"> • Final WG reports and associated documentation was circulated before Christmas • Some comments on the circulated legal text are to be removed where they have been addressed. RW confirmed that there would be no material changes and will confirm by email later today. • RW confirmed that the legal text as voted upon in the WG on 6 December is substantially the same as that circulated on 22 December. • RW confirmed that similarly the Mapping Table would be tidied up to remove any inappropriate comments – no material changes • RW confirmed that there are 3-4 RES documents where minor changes are required. These changes are to the E&W RES documents and RW will confirm if there are any implications to the Scottish TO. • RW to circulate the RES drafts as soon as possible, rather than waiting for papers day for the February GCRP. • Agreed that the GCRP accepts the WG report, agrees that the ToR have been met and to proceed to CA consultation • CA will not circulate the CA report to the GCRP before publication – primarily due to the lack of time – although under GCode governance there is no need to circulate these CA consultations. • AMC made the point that stakeholders need understand that there are two consultations planned that will be run in parallel– one for the GCode changes and one for the DCode changes. CA will liaise with Dave Spillett to make sure this is co-ordinated. Some of the text included in the joint WG report shouldn't be included in the GCode CA consultation. • Next meeting will probably be on 8 February. NGET to confirm. • All three Final Modification Reports will be submitted to Ofgem at the same time.
